

Aryan Khanduri

+91 9501726991 khanduri.aryan26@gmail.com linkedin.com/in/aryankhanduri github.com/AryanKhanduri

Computer Science Engineering student with hands-on experience in Java, JavaScript, Python, SQL, and modern web development. Developed responsive web applications using HTML, CSS, JavaScript, REST APIs, and frontend development best practices. Published IEEE research on an Augmented Reality-based Campus Navigation System and completed a Blockchain Development Internship at Metacrafters. Passionate about Software Engineering, Frontend Development, Full-Stack Development, and building practical technology solutions that solve real-world problems.

Skills

- Programming Languages: Java, JavaScript (ES6+), Python, SQL
- Data Structures & Algorithms
- Front End Development : HTML5, CSS3, React.js, DOM Manipulation, Responsive Web Design,
- Database Management : SQL, MySQL
- Tools & Technologies : Git, GitHub, VS Code, Postman
- Cloud Platform : AWS Basics
- Core Computer Science : Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Problem Solving

Projects

AI Job Helper — React.js, FastAPI, Python, FAISS, RAG

Ongoing

- Developing an AI-powered platform for resume analysis, ATS scoring, and job application management.
 - Integrating React frontend components with FastAPI-based backend APIs and vector search capabilities.
 - Implementing document retrieval and contextual question answering using Retrieval-Augmented Generation (RAG).
 - Building application tracking, resume feedback, and career assistance features.
- Github Repository

Campus Navigation System

August 2025

- Developed an interactive AR-based navigation system with real-time location tracking and AR overlays for guiding students and visitors across the university campus.
- Utilized Unity and AR frameworks to create a seamless and intuitive navigation interface, successfully improving campus accessibility.

WeatherSphere – Real-Time Weather Application React.js, JavaScript, OpenWeather API, Vite

June 2026

- Developed a responsive weather dashboard using React and OpenWeather API to display real-time weather information.
 - Implemented React state management using Hooks and integrated external REST APIs using asynchronous JavaScript.
 - Displayed temperature, humidity, wind speed, weather conditions, and dynamic weather icons.
 - Added loading states, error handling, and conditional rendering to improve user experience.
 - Managed source code using Git and GitHub.
- Github Repository

Professional Experience

SAYAU Dining Chain

2025

- Developed responsive user interfaces using React and JavaScript.
- Collaborated on frontend feature implementation and UI enhancements.
- Integrated APIs and improved application usability.

Metacrafter Internship (Blockchain & JavaScript)

May 2024 – July 2024

- Developed and deployed Ethereum smart contracts using Solidity, implementing core blockchain functionalities and testing contract interactions through JavaScript-based environments.
- Worked on real-world blockchain projects, enhancing problem-solving and development skills.

Publications

An Inclusive and Hybrid Campus Navigation System: Comparative Evaluation of Pathfinding Algorithms and Multi-Modal Positioning Technologies International Journal of Novel Research and Development (IJNRD), June 2025
Publication Link

Education

Chandigarh University, Gharuan, Punjab

Jul 2022 – Present

Bachelor of Engineering - Computer Science (BE-CSE)

CGPA : 7.0/10
